

Grower Gathering How to Make & Use Biochar

sponsored by Carbon-Negative Network Northeast

10am – 4pm, **Sunday, August 8**

Eagle's Flight Farm

212 Mt. Independence Road, Orwell, VT
www.elfarm.com

Biochar is the key to a new carbon-negative strategy to sequester carbon, create sustainable soil fertility, grow nutrient-dense crops, produce renewable biofuels, and reverse global climate change.

Farmers and gardeners are key leaders in this effort, since the key action is to add charcoal to soil.

This gathering will teach growers simple methods to acquire biochar and incorporate it in soil.

ACTIVITIES

Morning: **Making Biochar**

Show 'n Tell equipment & operation
BYOB = bring your own burner
www.carbon-negative.us/burners

Noon: **Potluck Lunch**

Lunch will be potluck; bring a dish to share
Volunteers needed for service & clean-up

After Lunch: **Network Discussion**

How to implement carbon-negative strategy
in Champlain farms and communities

Afternoon: **Using Biochar in Soil**

How to prepare biochar for soil,
and ways to inoculate with microbiology

Closing: **Future Gatherings**

Place & plan for another gathering

\$20

Please pre-register to help us plan this event
includes a bag of inoculated biochar,
ready-to-use in a soil test plot
